

Astronaut Soundfield

Wireless Voice Amplification System

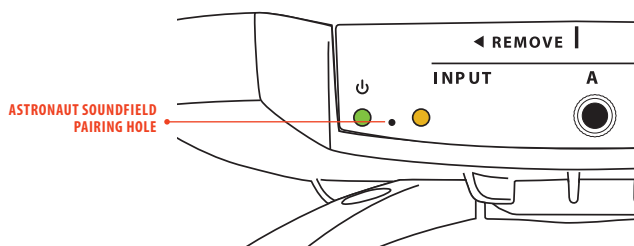

PAIRING INSTRUCTIONS

Orbiter Pairing Instructions

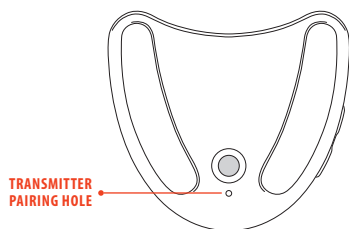

- 1) Make sure the Orbiter pendant transmitter has been properly charged and is NOT connected to the charger.
- 2) The Orbiter transmitter must be ON in order to pair (green LED)
- 3) The Astronaut Soundfield must be ON in order to pair (green LED)
- 4) Straighten the end of a medium paper clip.

- 5) Insert the end of the paper clip approximately $\frac{1}{16}$ " (1.5 mm) into the pairing hole on the Astronaut Soundfield speaker. Use a light press when inserting the paper clip not to damage the hardware. The amber light will begin to flash indicating that it's in pairing mode.

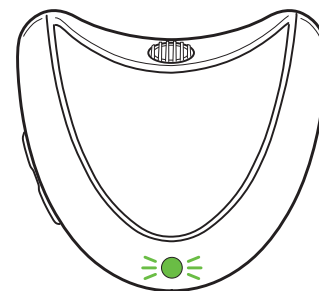

- 6) Insert the end of the paper clip approximately $\frac{1}{2}$ " (1.3 cm) into the pairing hole on the transmitter. Use a light press when inserting the paper clip not to damage the hardware. Successful pairing will result in a solid amber light on the Astronaut Soundfield.

- 7) Receiver pairing mode lasts only a short time. If unsuccessful, repeat steps 5 and 6.
