#### Cables

RCA to 3.5mm Female Stereo Cable

Speaker Cable, 3.5mm M-M

## CONNECT TO MULTIMEDIA

Connect up to 3 sources for simultaneous playback, including: computers, laptops, smartphones, DVD's, tablets, and more.

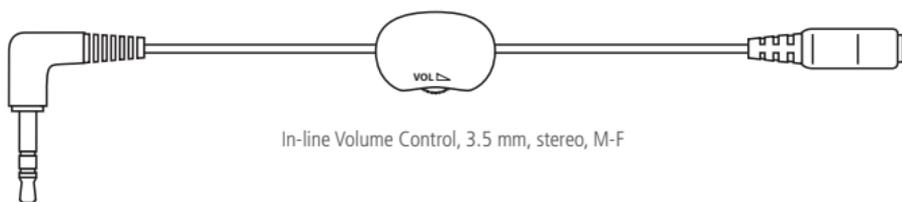

**SOURCE CABLE**  
Stereo/Mono 3.5 mm

## CONNECT VOLUME CONTROL (OPTIONAL)

The Ensemble does not have an internal volume control. Use the volume control on the multimedia device or the included in-line volume control. For fixed sources like a DVD player, the external volume control is required.

In-line Volume Control, 3.5 mm, stereo, M-F

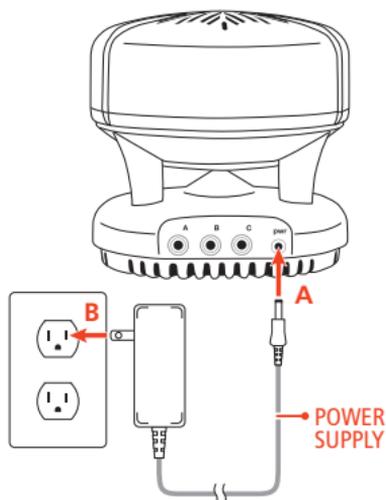

## CONNECT TO POWER

### PLUG IN THE POWER SUPPLY

Plug the power adapter into a suitable source of 110-220v power **B**, and the opposite small end into the base of the Ensemble speaker **A**.

### TURN ON THE SOURCE

Turn on the source and slowly turn up the volume (on both the source and the in-line volume control). Once you are satisfied with the sound, add additional sources to the other input jacks so you can use them without changing connections every time.
